“I bring over **2+ years** of hands-on experience in proficiently utilizing the following key skills:”

Skills

- Java | Javascript | Python | RDBMS | SQL/NoSql | Visual C | C | CPP | AWS | Docker
- Microservices | MVC | Spring | Spring Boot | Hibernate | JUNIT | Oauth , JWT | AngularJs | MongoDB | Eureka | REST | MySql | ORM

Experience

Software Development Engineer

EasyPay Pvt Ltd.

Pune, MH, INDIA 01/2022 - Current

- **“Digital Lending Platform”**: Led the design and development of a digital lending platform, enabling efficient and automated lending processes. Collaborated closely with the **product team** to understand business requirements and translate them into scalable and secure **backend** solutions.
 - Developed **Java Spring Microservices** and backend functionalities to handle loan origination, loan management, and borrower data integration.
 - Integrated **third-party apis** for data providers and credit bureaus to automate credit scoring and decision-making processes.
 - Implemented data **ORM** persistence using hibernate and retrieval using appropriate databases such **MySQL** and **Redis**.
 - Developed backend functionalities to handle payment processing, **cron scheduling** for generating payment requests, handling **webhooks**, **callbacks**, and managing transaction status updates.
 - Developed loan portal/dashboard using **AngularJS** technology and Java APIs, providing a platform to track user loan journeys.
- **Reported directly to the CTO**: Developed and implemented **Know Your Customer (KYC) API** functionality in a mobile Application.
 - Integrated verification services for identity verification, name matching, document scanning and facial recognition.
 - KYC reduced the number of manual verification by **95%** setting major success for automation.
- **“Payment Gateway”** : Implemented payment gateway API integration using industry-standard protocols such as **RESTful** APIs, **SOAP** and **WebView**, ensuring data integrity with **API security** using **Oauth** and **JWT** implementaion.
- “Collaborated with **DevOps** teams to automate deployment processes and ensure **CI/CD** by using **docker**.”

Education

Bachelor in Computer Application

MIT-SOM University

Pune, MH, INDIA

2015 - 2020

- Major in Application and Computer programming
